BLO-LINE® A1 MONITORS

## What do you have to decide before ordering your BLO-Line®?

ALIGNMENT

Please specify when ordering, whether the monitor should be installed in portrait or landscape mode. Both versions are priced the same. The construction is adapted to the respective type of installation (here front view of the mounting plate).
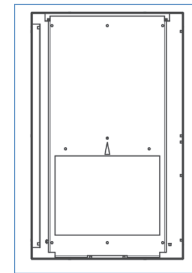

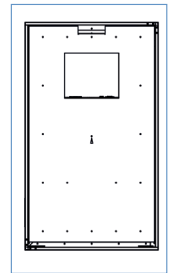

LANDSCAPE

BLO-Line® 24 - 43 Landscape

BLO-Line® 46 - 64.5 Landscape
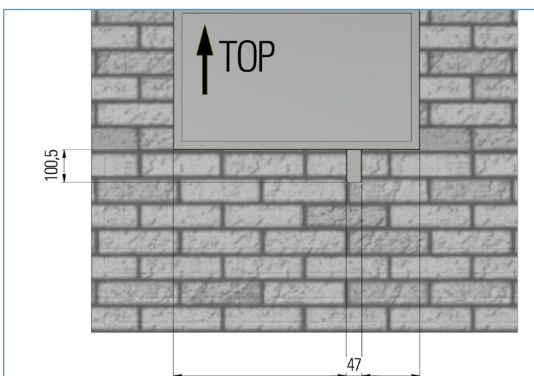

PORTRAIT

BLO-Line® 24 - 43 Portrait

BLO-Line® 46 - 64.5 Portrait

CABLE CONNECTIONS

The monitor is attached to the mounting plate in such a way that the sockets/ connections are in the area of the recess in the wall mount. If this is not possible, you can order our optional cable canal connection suitable for the respective screen size. This gives you the possibility of installing a fireproof cable canal up to the monitor and laying the required cables, e.g. for power or video signals, right into the monitor. The cable canal connection is 47 mm in width, 100.5 mm in length and 30 mm in depth. The position varies depending on the size in the landscape format. A fitting cable canal suitable for fire protection up to your connection possibility should be selected so that it covers our cable canal. You will find the dimensions of the recesses, the cable canal connection and the monitor in the drawings of the respective screen size on our homepage in the download area.
