Introduction

Product Description

IB897 is a 3.5-inch single board computer based on the Intel® Atom™ E3800 series processors. It supports two DDR3L (1.35V) SODIMM sockets for a maximum memory capacity of 8GB.

IB897 features the Intel® Gen7 w/4EUs graphics engines and has both CRT and DisplayPort video display interface, and 24-bit LVDS dual channel interface with the use of the NXP PTN3460 device.

Onboard connections are available for two SATAII ports, two COM ports, one USB 3.0 ports, four USB2.0 ports, audio, two Mini PCI-e(x1) slots, and Micro SD. Power input is made with a +9~+30V DC in interface.

IB897 Features:

- Supports Atom™ E3800 series SoC processors
- Two DDR3L SO-DIMM, 1066/1333 MHz, Max. 8GB memory
- Integrated graphics for VGA, DP displays
- 2 x SATA II connectors
- 2x COM port connectors
- 1 x Mini-PCIe(x1) slot (*w/ USB/mSATA support*)
- 1 x Mini-PCIe(x1) slot (*w/ USB support*)
- 2x GbE (RJ-45) connectors
- 24-bit dual channel LVDS
- Micro SD
- 1x 9V to 30V DC-in power connector

Specifications

Product Name	IB897
Form Factor	3.5" disk size SBC
SoC Type/Speed	Intel® Atom™ QC E3845 /2MB cache/1.91GHz (IB897-I45&I45P) Intel® Atom™ DC E3827 /1MB cache/1.75 GHz (IB897-I27&I27P) Intel® Atom™ SC E3815 /512KB cache/1.46 GHz (IB897-I15& I15P) Package = FCBGA1170, 25mmx27mm, 22nm,Tj= -40° C to +110° C
BIOS	AMI BIOS
Memory	Intel® Atom™ SoC integrated memory controller Support DDR3L (1.35V only), Non-ECC memory only 2 x DDR3 SO-DIMM socket [IB897-I45_P/IB897-I27_P], 8GB max. 1 x DDR3 SO-DIMM socket [IB897-I15_P], 4GB max.
VGA	Intel® Gen7 w/4 EUs graphics engines DisplayPort x 1 [Support to 2560x1200@60Hz] CRT x 1 via pin header [Support to 1920x1080@60Hz]
LVDS	24-bit dual channel via NXP PTN3460 thru eDP (Support to 1920x1200 @ 60 Hz)
LAN	Intel® I210IT PCIe Gigabit LAN x 2
USB	Intel® Atom™ SoC built-in USB host controller Support USB 2.0 x 4 ports; USB 3.0 x 1 port, extra USB 2.0 x4 ports (Thru SMC HUB USB2514)
Serial ATA	Intel® Atom™ SoC built-in SATA II controller, supports 2 ports
Audio	Intel® Atom™ SoC built-in HD Audio controller + Realtek ALC269QHD Codec w/class-D speaker amplifier (2.3W per channel @ 5V power supply) [7mm x 7mm @ 48-QFN]; support 2-channel audio out + amp
LPC I/O	Nuvoton NCT5523D [64-pin LQFP, 7x7x1.4mm] - COM #1 (RS232/422/485) [EXAR SP339EER1 x 1 for jumper-less] - COM #2 (RS-232 only) [Hardware Monitor]: 2x Thermal inputs; 2x Voltage monitoring
Digital IO	4 in & 4 out
Expansion Slots	Mini PCI-e socket x2 (1xFull-sized+1xHalf-sized,) **Full length MiniPCIe (1x) support mSATA**
Edge Connector	DB9 for COM1, DisplayPort, RJ45 x 2 for LAN 1 & 2 USB 2.0 vertical connector x 1, USB 3.0 vertical connector x 1 LED indicators (red+green) x1 for power and HDD status & power button x 1 (IB897-I45/I27/I15) 4-pin header for LED indicator & 2-pin header for power button via cable (IB897-I45P/I27P/I15P)
Onboard Header/ Connector	2x8 pin header for CRT; 2x4 pin header for 2x USB 2.0 DF20 socket connector x2 for 24-bit dual channel LVDS 4-pin box header for backlight/brightness control (PWM) 2x6 pin box header for Audio, 4-pin header for speaker 2x5 pin box header for COM2 2x5 pin headers for LPC (80-port card debugging purpose) Mini PCI-e(1x) connector x2, 5 pins box header for smart battery SATA connector x 2 for SATA device 4-pins power connector (JST type, for SATA device) 2-pins connector for power input, Micro SD slot (type 3.3V)
Watchdog	Yes (256 segments, 0, 1, 2...255 sec/min)
Power Connector	9V ~ 30V DC-in thru onboard 2-pin connector
Others	iSMART 2.0 [Auto-scheduler / Power resume]
OS Support	Windows 8.1 / Embedded; Windows 7 / Embedded, Linux
RoHS / REACH/ CE / FCC	Yes / Yes / Yes / Class B
Operating Temp.	-40° C to +85° C
Board Size	102mm x 147mm

Checklist

Your IB897 package should include the items listed below.

- The IB897 SBC
- This User's Manual
- 1 CD containing chipset drivers and flash memory utility

INTRODUCTION

Board Dimensions for [IB897-I45/I27/I15]

Board Dimensions for [IB897-I45P/I27P/I15P]

Installations

This section provides information on how to use the jumpers and connectors on the IB897 in order to set up a workable system. The topics covered are:

Installing the Memory	6
Setting the Jumpers	7
Connectors on IB897	11

Installing the Memory

The IB897 board supports TWO DDR3L memory socket for a maximum total memory of 8GB DDR3L memory type.

Installing and Removing Memory Modules

To install the DDR3L modules, locate the memory slot on the board and perform the following steps:

1. Hold the DDR3L module so that the key of the DDR3L module aligned with that on the memory slot.
2. Gently push the DDR3L module in an upright position until the clips of the slot close to hold the DDR3L module in place when the DDR3L module touches the bottom of the slot.
3. To remove the DDR3L module, press the clips with both hands.

**** Channel-A slot must be installed with memory module for booting up****

Setting the Jumpers

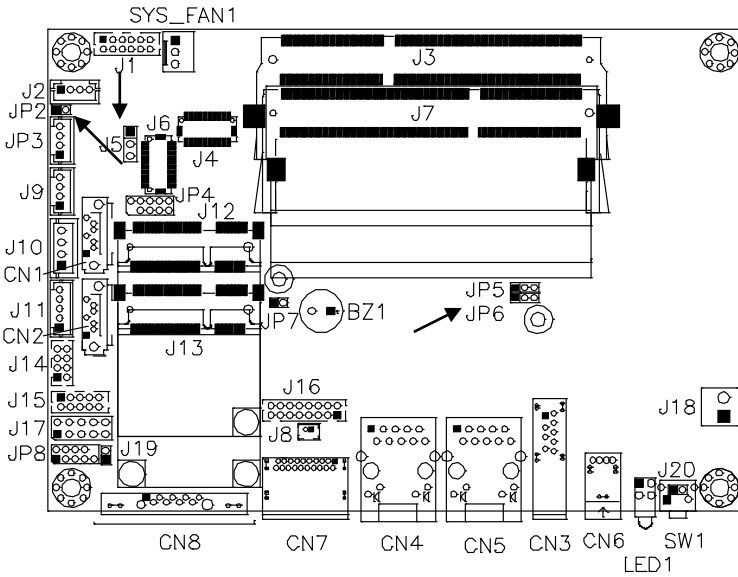

Jumpers are used on IB897 to select various settings and features according to your needs and applications. Contact your supplier if you have doubts about the best configuration for your needs. The following lists the connectors on IB897 and their respective functions.

BIOS Setup

This chapter describes the different settings available in the AMI BIOS that comes with the board. The topics covered in this chapter are as follows:

BIOS Introduction	28
BIOS Setup	28
Main Settings	26
Advanced Settings	30
Chipset Settings	38
Security Settings	39
Boot Settings.....	40
Save & Exit Settings	41
Additional Information about OS Installation.....	34

BIOS Introduction

The BIOS (Basic Input/Output System) installed in your computer system's ROM supports Intel processors. The BIOS provides critical low-level support for a standard device such as disk drives, serial ports and parallel ports. It also provides password protection as well as special support for detailed fine-tuning of the chipset controlling the entire system.

BIOS Setup

The BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS ROM of the system stores the Setup utility. When you turn on the computer, the BIOS is immediately activated. Pressing the key immediately allows you to enter the Setup utility. If you are a little bit late pressing the key, POST (Power On Self Test) will continue with its test routines, thus preventing you from invoking the Setup. If you still wish to enter Setup, restart the system by pressing the "Reset" button or simultaneously pressing the <Ctrl>, <Alt> and <Delete> keys. You can also restart by turning the system Off and back On again. The following message will appear on the screen:

Press to Enter Setup

In general, you press the arrow keys to highlight items, <Enter> to select, the <PgUp> and <PgDn> keys to change entries, <F1> for help and <Esc> to quit.

When you enter the Setup utility, the Main Menu screen will appear on the screen. The Main Menu allows you to select from various setup functions and exit choices.

Warning: *It is strongly recommended that you avoid making any changes to the chipset defaults. These defaults have been carefully chosen by both AMI and your system manufacturer to provide the absolute maximum performance and reliability. Changing the defaults could cause the system to become unstable and crash in some cases.*

Boot Settings

This section allows you to configure the boot settings.

Aptio Setup Utility - Copyright © 2013 American Megatrends, Inc.

Main	Advanced	Chipset	Boot	Security	Save & Exit
Boot Configuration					
Setup Prompt Timeout			1		
Bootup NumLock State			On	→ ← Select Screen	
Quiet Boot			Disabled	↑ ↓ Select Item	
Fast Boot			Disabled	Enter: Select	
				+- Change Opt.	
				F1: General Help	
Boot Option Priorities				F2: Previous Values	
Boot Option #1			UEFI:Built-in EFI	F3: Optimized Defaults	
				F4: Save & Exit	
				ESC: Exit	

Setup Prompt Timeout

Number of seconds to wait for setup activation key.
65535(0xFFFF) means indefinite waiting.

Bootup NumLock State

Select the keyboard NumLock state.

Quiet Boot

Enables or disables Quiet Boot option.

Fast Boot

Enables or disables boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.

Boot Option Priorities

Sets the system boot order.

Save & Exit Settings

Aptio Setup Utility – Copyright © 2013 American Megatrends, Inc.

Main	Advanced	Chipset	Boot	Security	Save & Exit
Save Changes and Exit Discard Changes and Exit Save Changes and Reset Discard Changes and Reset Save Options Save Changes Discard Changes Restore Defaults Save as User Defaults Restore User Defaults Boot Override					→ ← Select Screen ↑ ↓ Select Item Enter: Select +- Change Opt. F1: General Help F2: Previous Values F3: Optimized Defaults F4: Save & Exit ESC: Exit

Save Changes and Exit

Exit system setup after saving the changes.

Discard Changes and Exit

Exit system setup without saving any changes.

Save Changes and Reset

Reset the system after saving the changes.

Discard Changes and Reset

Reset system setup without saving any changes.

Save Changes

Save Changes done so far to any of the setup options.

Discard Changes

Discard Changes done so far to any of the setup options.

Restore Defaults

Restore/Load Defaults values for all the setup options.

Save as User Defaults

Save the changes done so far as User Defaults.

Restore User Defaults

Restore the User Defaults to all the setup options.

This page is intentionally left blank.

Drivers Installation

This section describes the installation procedures for software and drivers. The software and drivers are included with the motherboard. If you find the items missing, please contact the vendor where you made the purchase. The contents of this section include the following:

Intel Chipset Software Installation Utility	44
VGA Drivers Installation.....	45
Realtek High Definition Audio Driver Installation.....	46
Intel Trusted Execution Engine Installation.....	47

IMPORTANT NOTE:

After installing your Windows operating system, you must install first the Intel Chipset Software Installation Utility before proceeding with the drivers installation.

Intel Chipset Software Installation Utility

The Intel Chipset Drivers should be installed first before the software drivers to enable Plug & Play INF support for Intel chipset components. Follow the instructions below to complete the installation.

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) Baytrail Chipset*. Click *Intel(R) Chipset Software Installation Utility*.

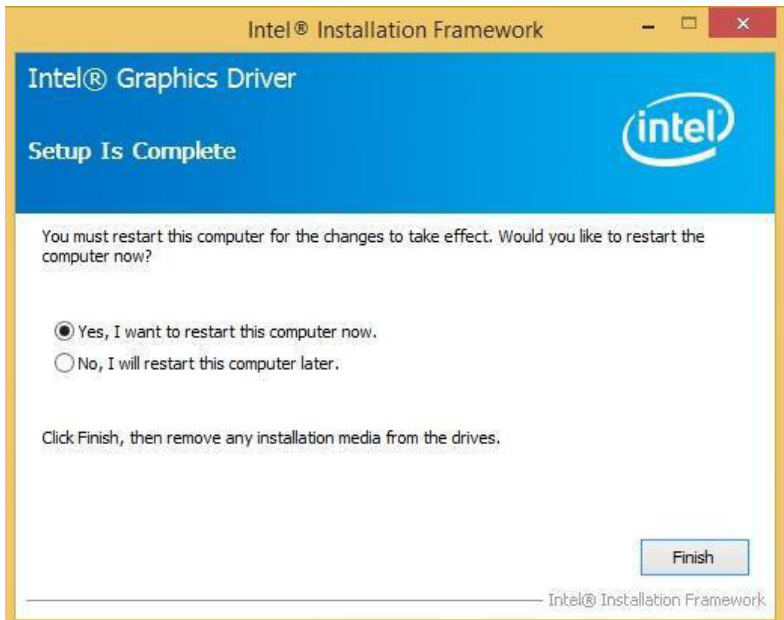

3. When the Welcome screen to the Intel® Chipset Device Software appears, click *Next* to continue.
4. Click *Yes* to accept the software license agreement and proceed with the installation process.
5. The Setup process is now complete. Click *Finish* to restart the computer and for changes to take effect.

VGA Drivers Installation

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) Baytrail Chipset*. Click *Intel(R) Baytrail Graphics Driver*.

2. When the Welcome screen appears, click *Next* to continue.
3. Click *Yes* to accept the license agreement and continue the installation.
4. Setup complete. Click *Finish* to restart the computer and for changes to take effect.

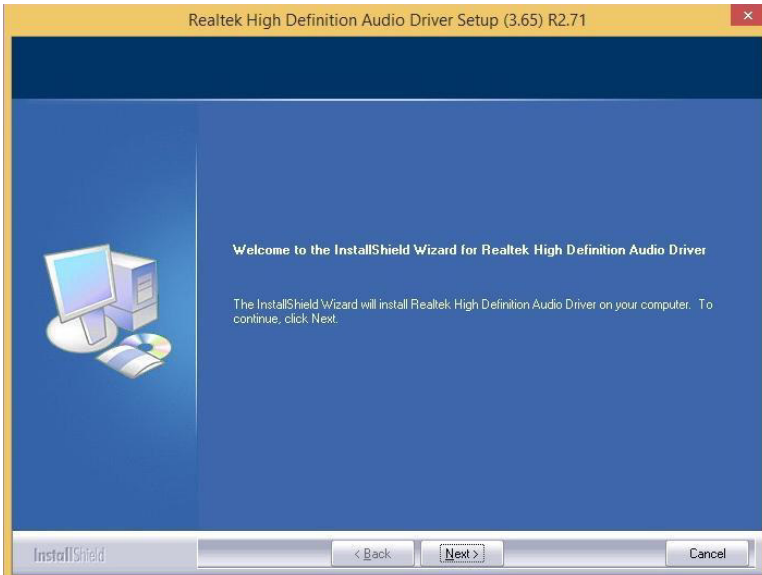

Realtek High Definition Audio Driver Installation

1. Insert the DVD that comes with the board. Click *Intel* and then *Intel(R) Baytrail Chipset*. Click *Realtek High Definition Audio Driver*.

2. On the Welcome screen, click *Next* to proceed with the installation.

3. InstallShield Wizard is complete. Click *Finish* to restart the computer and for changes to take effect.

Intel Trusted Execution Engine Installation

Note :Windows 7 OS only

Important Notes

- 4) Intel TXE PV Firmware is signed by Intel
 - PV POR configuration is signed Intel TXE FW and Production Silicon
 - Signed Intel TXE FW and Pre Production Silicon is supported for development needs only

Combination of unsigned Intel TXE Firmware and Production Silicon is not supported and will result in unexpected behavior

- 5) For Windows 7 OS only:
Intel® Trusted Execution Engine Interface (Intel® TXEI) Driver uses KMDF (WDF) 1.11, which is built-in on Windows 8 and Windows 8.1. However, Windows 7 doesn't have it. Please install Kernel-Mode Driver Framework (KMDF) version 1.1. Otherwise, yellow bang appears on Intel TXEI device upon installation. Please follow instructions in this [link: KB2685811](#)

Other names and brands may be claimed as the property of others.
All products, computer systems, dates and figures specification preliminary based on current expectations, and are subject to change without notice.

Intel Confidential

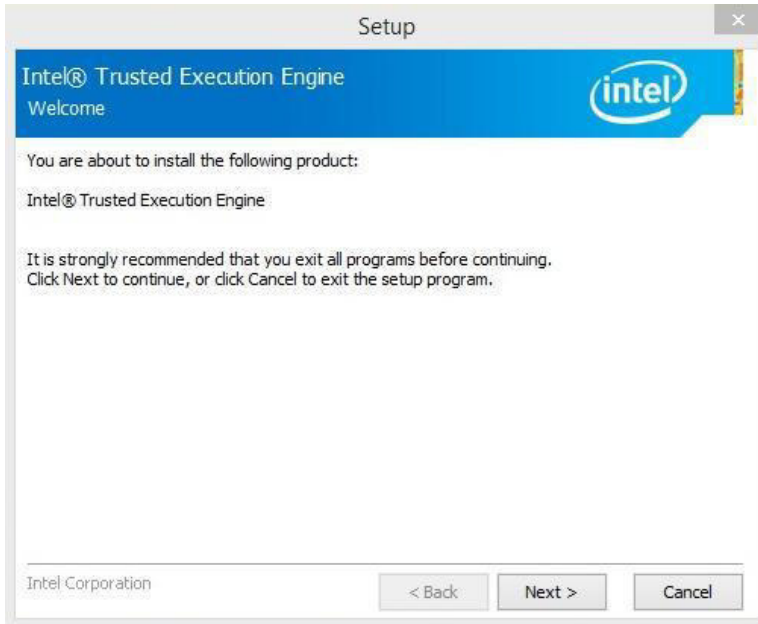

6

1. Insert the DVD that comes with the board. Click **Intel** and then **Intel(R) Baytrail Chipset**. Click **Intel(R) Baytrail Graphics Driver**.

2. On the Setup Welcome screen, click *Next* to proceed with the installation process.

3. Click *Next* accept the license agreement and continue the installation.

4. Installation of the Intel Trusted Execution Engine is now complete. Click *Finish*.

Appendix

A. I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
0000h-001Fh	Direct memory access controller
0000h-001Fh	PCI bus
0040h-0043h	System timer
0050h-0053h	System timer
0070h-0077h	System CMOS/real time clock
0081h-0091h	Direct memory access controller
0093h-009Fh	Direct memory access controller
00C0h-00DFh	Direct memory access controller
00F0h-00F0h	Numeric data processor
02F8h-02FFh	Communications Port (COM2)
03B0h-03BBh	Intel(R) HD Graphics 4600
03C0h-03DFh	Intel(R) HD Graphics 4600
03F8h-03FFh	Communications Port (COM1)
0D00h-FFFFh	PCI bus
E000h-EFFFh	Intel(R) 8 Series/C220 Series PCI Express Root Port #7 - 8C1C
F000h-F03Fh	Intel(R) HD Graphics 4600
F040h-F05Fh	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
F060h-F07Fh	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0A0h-F0A3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0B0h-F0B7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0C0h-F0C3h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0D0h-F0D7h	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
F0E0h-F0E7h	Intel(R) Active Management Technology - SOL (COM3)

B. Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System Timer
IRQ3	Serial Port #2
IRQ4	Serial Port #1
IRQ 10	Intel(R) 8 Series/C220 Series SMBus Controller - 8C22
IRQ 13	Numeric data processor
IRQ 16	High Definition Audio Controller
IRQ 16	Intel(R) 8 Series/C220 Series USB EHCI #2 - 8C2D
IRQ 16	Intel(R) Management Engine Interface
IRQ 19	Intel(R) 8 Series/C220 Series SATA AHCI Controller - 8C02
IRQ 19	Intel(R) Active Management Technology - SOL (COM3)
IRQ 22	High Definition Audio Controller
IRQ 23	Intel(R) 8 Series/C220 Series USB EHCI #1 - 8C26

}
//-----
```

D. Watchdog Timer Configuration

The WDT is used to generate a variety of output signals after a user programmable count. The WDT is suitable for use in the prevention of system lock-up, such as when software becomes trapped in a deadlock. Under these sorts of circumstances, the timer will count to zero and the selected outputs will be driven. Under normal circumstance, the user will restart the WDT at regular intervals before the timer counts to zero.
